Code 99 is used when it is necessary manually to correct a value, e.g. when the total energy is known but hour-allocation must be estimated or used when no measurements are available and the values must be estimated from the same kind of metering points or the same kind of period for the same metering point.</p> <p>Z01 is used for manual consumption corrections in the gas market (the consumption is validated).</p> <p>(Estimated annual volume) is used only for profiled settled metering points.</p>	<p>Quantity status code / <u>Kvantum status kode</u></p>
